MU-78

MU-78 is a non-yellowing anionic synthetic fatliquor.

Recommend in use for all soft leathers especially for garment and upholstery leather.

Specification:

Appearance: Yellowish or transparent liquid (20⁰C)

Activity: 45%±2

PH (10%): 6.0-7.0

Light fastness: Excellent

Leather properties

※Good penetration, fullness and touch feeling like garment

※Produces leather with very lightweight and drum soft effect.

Application

Garment Cow : 6-8% combined with other natural fatliquor in order to reach perfect balance of softness and hand feel.

Goat: 6-8% combined with other natural fatliquor in order to reach perfect balance of softness and hand feel. Recommended to add MU-78 by 2-3 times when used in combination with other natural oils. Using 12% for white goat gloves production can get very good soft, round and non-yellowing leather.

Sheepskin: The amount of 6-8% used together with MU-333,R-208 can produce a perfect combination.

Shoe Nappa: 2-3% in combination with other fatliquor makes extreme softness.

Nubuck : 2-3% to be used for a nice surface effect and a pleasant hand feel.

Split Suede: 1-2%

Upholstery: 6-8% used with other fatliquor.

Waterproof: Applied with waterproofing fatliquor gives garment and glove leather a very strong water repellent surface.

Emulsion:

Stir with proper amount water, or use directly without dilution.
