SUPPLIERS OF AFRICAN MIMOSA EXTRACTS

MIMOSA FSPOWDER

An exceptionally light coloured spray-dried dedusted Mimosa extract treated to produce a much less astringent, highly soluble product with improved lightfastness.

Especially suitable for the tannage of hides and skins where very rapid tannin penetration is required.

An ideal product for combination tannages involving both Mimosa and aluminium tanning agents.

Its very pale colour renders it eminently suitable for the retannage of chrome leather where light colours are desired.
